

Muhammad Sajid

Full-Stack Web Developer

muhammadsajidrajput20@gmail.com | +92-3453696819 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-Stack Web Developer and Software Engineering student at MUET with hands-on experience architecting and shipping scalable MERN-stack applications. Delivered real-world projects spanning e-commerce, real-time ride-pooling, and food-ordering platforms — each featuring secure JWT authentication, RESTful APIs, WebSocket integration, and polished responsive UIs. Passionate about clean architecture, performance optimization, and user-centered design.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, EJS
Backend: Node.js, Express.js, RESTful API Design, Socket.IO, JWT Authentication
Databases: MongoDB, MySQL
Tools: Git, GitHub, Vite, VS Code
Concepts: MVC Architecture, Role-Based Access Control, Responsive Design, OOP

PROJECTS

Pizza Palace — Full-Stack Pizza Ordering Platform

Mar – Apr 2026

React · Vite · Tailwind CSS · Node.js · Express.js · MongoDB · JWT

Architected a full-stack ordering platform with JWT-secured authentication, a dynamic pizza builder, and a structured multi-stage order lifecycle workflow.

Built a role-based admin dashboard enabling real-time order management, inventory control, and automated low-stock email alerts via Nodemailer.

Engineered live order tracking and a fully responsive UI optimized for both desktop and mobile viewports.

Amazon-Inspired E-Commerce Web App

Apr – May 2026

React · Vite · Axios · Node.js · Express.js · Sequelize ORM · SQLite

Delivered a production-ready marketplace with product browsing, full-text search, cart management, and a complete end-to-end checkout flow.

Designed a scalable RESTful API layer using Sequelize ORM handling order processing, cart operations, and full product CRUD functionality.

Implemented real-time UI feedback through optimistic updates and Axios-driven async state management for smooth user interactions.

UniRide — Student Ride-Pooling Platform

Jan – Feb 2025

Node.js · Express.js · MongoDB · Socket.IO · Tailwind CSS · EJS

Co-built a real-time ride-pooling platform helping university students find and share inter-city rides, developed during a competitive hackathon sprint.

Implemented bidirectional WebSocket communication via Socket.IO for live ride-status updates, driver-rider matching, and instant notifications.

Contributed across API design, EJS frontend templating, MongoDB data modelling, and deployment — earning 20th Place & Public Voting Award.

Browser-Based Mini Projects (Rock Paper Scissors · Smart Calculator)

Jan 2024

HTML · CSS · JavaScript · Math.js

Built an interactive browser game with DOM manipulation, dynamic score tracking, animations, and a responsive layout.

Developed an advanced calculator with square root, percentage, answer recall, keyboard input, and LocalStorage history persistence.

EDUCATION

B.E. Software Engineering — Mehran University of Engineering & Technology, Jamshoro

Dec 2022 – Present

Relevant Coursework: Data Structures & Algorithms · Web Development · Database Systems · OOP · Software Project Management · Human-Computer Interaction · Artificial Intelligence

CERTIFICATIONS & ACHIEVEMENTS

- **Fundamentals of Java Programming** — Coursera (Sep 2023)
- **20th Place & Public Voting Winner** — Hack For Humanity 2025, DevPost (Feb 2025)
